## **2.0 SPECIFICATIONS AND REQUIREMENTS**

### **2.1 Background and Overview**

The health and safety of fire fighters is of great importance to the community. The Lunenburg and District Fire Department wants to ensure the safety of their fire fighters. Diesel vehicle exhaust contains a large number of carcinogens which can be very harmful to a fire fighter. When the trucks are started in the station, a large plume of exhaust is expelled into the open air, exposing fire fighters to the hazards of breathing these exhausts in. The vehicle exhaust extraction system will allow the trucks to be run inside during the winter months, so fire fighters can do their vehicle inspections.

### **2.2 Scope of Work**

The scope of work for this project will include the supply, delivery, and installation of an overhead duct system with six (6) drop apparatus connections with auto release.

### **2.3 Expectations**

The Town's expectations are that the successful proponent will supply, deliver, and install the vehicle exhaust extraction system at the Lunenburg and District Fire Department. The newly installed system will be in accordance with all applicable codes and standards.
