

#11. TOWN OF LUNENBURG POLICY

LEAF PICK-UP AND DISPOSAL

1. The Town will deal with the leaf situation in the Town with the following procedure, keeping in mind, cost efficiency, the environment, the effect on the Town drainage and sewer systems as well as the general appearance of the Town.
2. The Town will encourage all citizens to rake and bag leaves and place them beside the travelled portion of the road for the regular garbage pick-up or for pick-up by the Town.
3. The Town will pick-up leaves that are raked in piles by citizens beside the travelled portion of the road regardless of whether the leaves have been raked by citizens from private or public property.
4. The Town will have a spring and fall clean-up for leaves, limbs and other garden material. The fall clean-up will be held on three separate occasions and the Town to pick-up on one occasion. This will enable the Town to pick-up the majority of the leaves at designated times and reduce trucking and labour costs. These clean-ups will be held in co-operation and conjunction with the garbage contract schedule.
5. The Town will rake and collect leaves as in the past on Town parks and streets on an as needed basis.
6. The Town will advertise this policy on a yearly basis, including the spring and fall clean-up days.
7. The Town will make every effort to compost all leaves that are collected by Town vehicles.
