

TOWN OF LUNENBURG

REQUEST FOR PROPOSALS

LUNENBURG ACADEMY DRAIN TILE FOUNDATION INSPECTION REPORT
TOL2021016

ADDENDUM #2 – August 27, 2021

This addendum is being issued in response to questions received from potential proponents in regards to the above mentioned Request for Proposals (RFP). The **closing date** for this RFP is also being **extended**. This addendum should be added to and made part of the original RFP document.

Q1: Would the excavation and all the contractor work related to the investigation, be provided and executed by the Town?

A1: The excavation of the two test holes will be done by the Town. If there is any other work related to the investigation, it would be up to the proponent.

Q2: Is the proponent required to provide a methodology for the actual investigation work?

A2: Yes – as it outlines on page 8 of the RFP - An exploratory methodology will be provided outlining the steps undertaken to investigate the Academy's drain-tile, foundation walls and sewer laterals. This will include excavation of two test holes (identified above) during a pre-inspection meeting later this Summer or early Fall (excavation undertaken by Public Works under the direction of the proponent and Town Staff) to expose the drain-tile and surface of the foundation wall. Care shall be given to ensure minimal damage to both the drain-tile and foundation wall.

Q3: I was also wondering if an extension of the deadline would be possible.

*A3: The closing date will now be extended to 2:00pm local time **September 10, 2021**. All other submission provisions and requirements remain the same.*
